Baby Loss Retreat was established in 2018 and aims to relieve the emotional and psychological suffering of parents, individuals and families who have suffered a bereavement following a stillborn, neonatal death, miscarriage, IVF, or medical termination by providing counselling, trauma therapy and listening music therapy. All our counsellors are qualified. When our Parents have completed the counselling sessions, they are given 2 days at one of our retreats in Scotland to reflect and talk as a couple about their grief and baby. With the charity going on for 6 years now we have seen the benefits this has for parents to understand their grief.
